

Green Legacy Hiroshima

The Green Legacy Hiroshima Working Group (WG) met for its first session on 30 November 2011. It consists of the core team from UNITAR/ANT-Hiroshima, plus the Hiroshima Peace Culture Foundation, Hiroshima Prefecture, Hiroshima University and the Botanical Garden. The WG reviewed developments of the pilot phase since its launch in July, and members brainstormed on the practical requirements/next steps for the second half of the year, when the planting initiatives worldwide will begin. The Working Group will be meeting every two months.
