

Greetings “Green Legacy Hiroshima’s Team”  
from **Kutaisi Botanical Garden!**

It’s very pleasant for us to collaborate with you. We remind you that in 2017 year you sent us 4 kind seeds of trees saved after atomic bombing of Hiroshima [1].

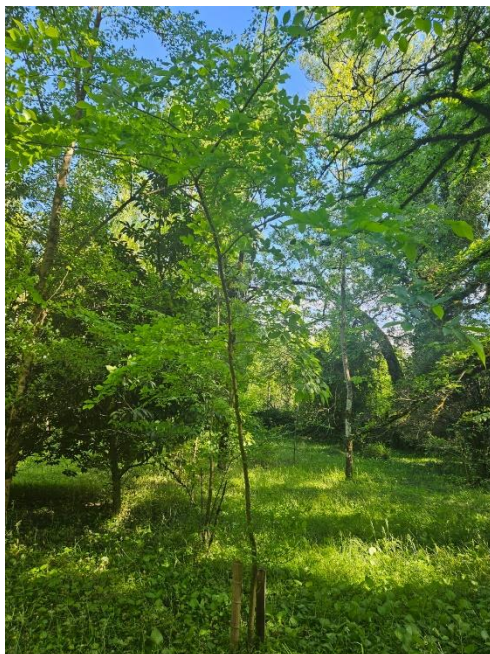

[1. List of seeds from “Green Legacy Hiroshima”].

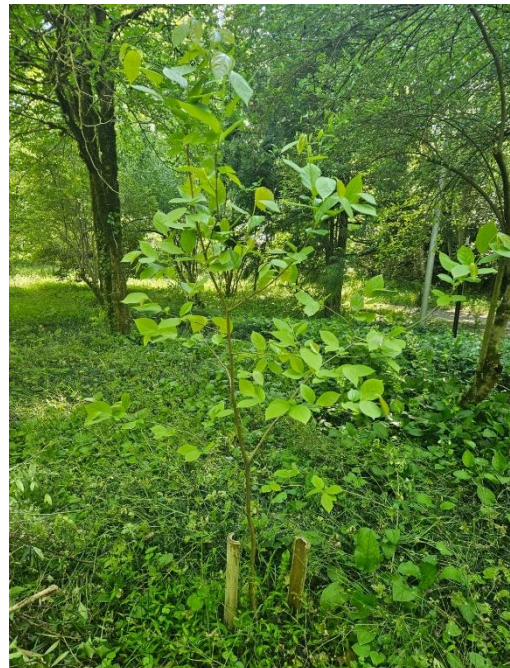

We will inform you which kind of action were provided within this project by our researcher’s team: The sowing of seeds was provided in the spring of 2017 year in the greenhouse. Emerged seedling were planted in the nursery in autumn of 2017 year, after 2 years baby plants were planted on the constant place – in the collection of East Asian Plants department

of botanical garden.

For today these plants are looking the pictures, added below [2, 3, 4, 5]:

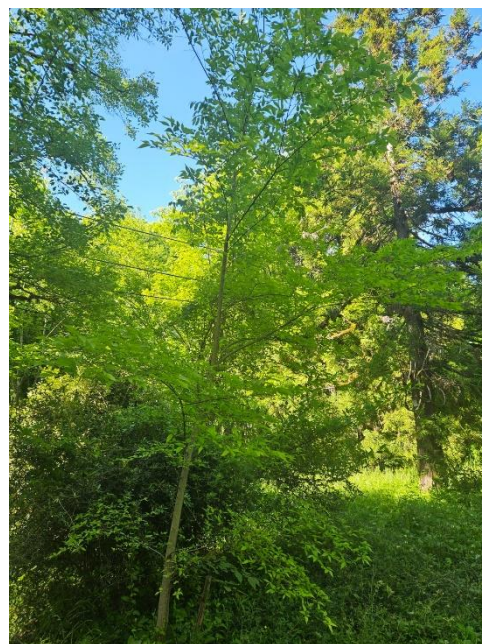

[2. Celtis sinensis]

[3. Diospyros kaki]

[4. *Ginkgo biloba*]

[5. *Aphananthe aspera* (Muku Tree)]

Thank you for collaboration and we will be glad to continue similar projects in future!

Best regards,

**Teimuraz Chechelashvili**, Director of Kutaisi botanical Garden

**Boris Tvalodze**, Doctor of biological sciences – The deputy of director Kutaisi Botanical Garden.
