

## Green Legacy Hiroshima

The 5th session of the Green Legacy Hiroshima Working Group was hosted by ANTHiroshima, on 2 August 2012. The members marked the successful completion of the pilot phase (July 2011-June 2012) and the establishment of the Voluntary Committee (任意団体 in Japanese) of GLH Initiative as of 1 July 2012. Also, the signature of a 3-year partnership Memorandum of Understanding with UNITAR was celebrated. After an update on the latest agreements with a number of countries worldwide, planned activities for 6 August commemoration ceremonies -- including hosting partners from Irkutsk Botanical Garden, and from the Chilean Embassy in Tokyo and conducting an introductory session for Hiroshima University's INU -- International Network of Universities (<http://www.inunis.net/>) peace program were discussed. Gardeners informed the WG members that seeds from the 2011-12 season were no longer available, and that over the next few weeks they would be updating the group and partners worldwide, as to the seeds and species available for the new planting season.
