

Green Legacy Hiroshima

The 12th GLH Working Group (WG) was hosted by the Hiroshima Peace Culture Foundation. The session began with an expression of gratitude by the co-founders to previous members who, due to professional changes, could no longer be present at the WG. All present also expressed their warm welcome to the many new members.

WG members were briefed on, and discussed, *inter alia*, the status of GLH partnerships worldwide, plans for dispatch of seeds or saplings to selected Mayors for Peace network of cities, status of seeds and saplings as of April, and progress with regard to the design of new plaques. They were also informed of the particular planting ceremony for a Hiroshima camphor being held on the same day (22 April) at the Singapore National University, to honor Earth Day.
